SANOK RUBBER
COLMANT CUVELIER

POWER TRANSMISSION
COURROIES ET COMPOSANTS - BELTS AND COMPONENTS

Sanok Rubber Colmant Cuvelier, a leading manufacturer of belts, offers a **wide range of HARVEST BELTS® agricultural belts** designed for combine harvesters and forage harvesters.

These belts have been developed to meet the needs of agricultural machinery users and provide an excellent alternative to the original installed belts.

Reliable, high-performance, and premium-quality, they ensure perfect power transmission and maximum efficiency.

CHARACTERISTICS

- Double or triple wrapping to improve abrasion resistance.
- Special rubber compounds to ensure excellent temperature resistance.
- Reinforced with polyester or aramid cords to guarantee optimal power transmission.
- Custom-made belts for flax pulling, carrot harvesting...

POWER-BANDS

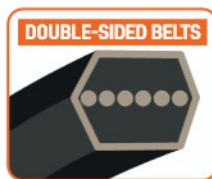

The banded belts with profiles HA, HB, HC, 15J, SPB, SPC are highly reliable thanks to a construction specifically designed for each profile. They make harvesting easier and meet the demanding requirements of the agricultural sector.

V-BELTS

V-belts with profiles Z, A, B, C, D, E, SPZ, SPA, SPB, SPC, 20x12.5 & 25x16 are designed for heavy-duty agricultural applications.

They contribute to high machine performance thanks to their flexibility, precise power transmission, and long operational lifespan.

VARIATOR BELTS

Variator belts with profiles HI, HJ, HK, HL, HM, 62x25, and widths from 28 to 68 are designed to provide reliable power transmission, ensuring smooth and efficient operation of your equipment.

DOUBLE-SIDED BELTS

Hexagonal belts with profiles HAA, HBB, HCC are designed for a good fit and for a uniform load, ensuring long and fault-free operation in agricultural drives.

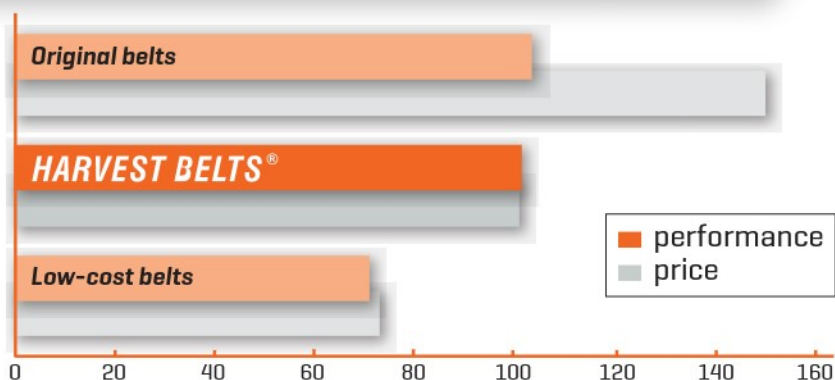

For many years, we have been manufacturing custom-made belts for flax pulling, carrot harvesting, and more. They are designed for optimal performance and durability.

Our Development Department is fully equipped to respond to your specific requests.

PERFORMANCES

HARVEST BELTS

» A great alternative to original equipment belts

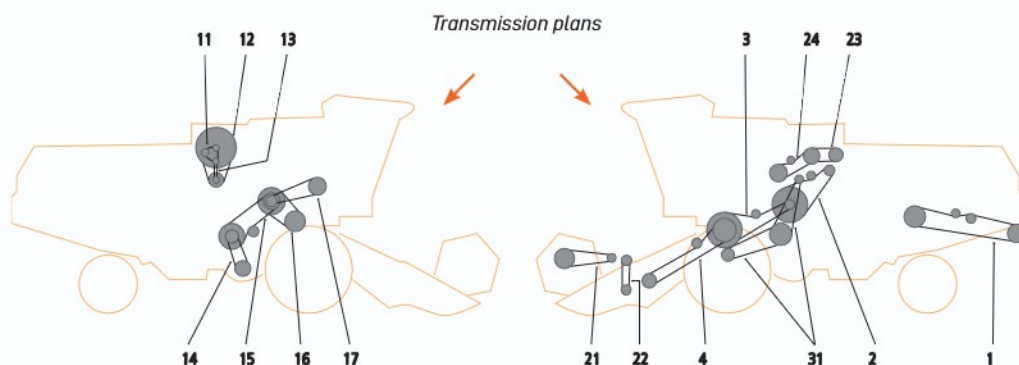

IDENTIFICATION

Our belts are identified by **OEM numbers**.

The customer must provide the original part number, and we will find the belt that matches the correct dimensions and application.

BELTS CATALOGUE

John Deere 1032 - 1042 - 1052

Machine brand and model

Numbers to facilitate belt identification and reference in the table

ITEM / POZYCJA	APPLICATION	OPIS	QUANTITY OF V-BELTS IN DRIVE / ILOŚĆ PASÓW W ZESPOLE	OE PART NUMBER / NUMER KATALOGOWY	COMMENT / UWAGI

Catalog covering over 8,000 references associated with more than 15 manufacturers' brands.

- Class
- Deutz Fahr
- Krone
- New Holland
- John Deere
- Massey Ferguson
- Laverda
- Case IH...

Complete summary with brands, models, plans, applications, number of belts per transmission, and OEM codes.

Choosing our belts means **investing** in high-quality materials for :

- better wear resistance
- a longer lifespan
- a protection against shocks
- superior performance
- reduced downtime
